

Sub-Contract Quality Engineering and CMM Inspection Service

We are proud to introduce our latest service for 2024...

New CMM Inspection Service

Sub-Contract Quality Engineering & CMM Inspection Service

RP Technologies is pleased to announce that from January 2024 we will be offering a new sub-contract CMM measurement and inspection service.

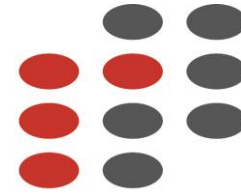

Accredited to ISO 9001:2015 standards, RP has always provided CMM inspection services to support the products which we've manufactured for our customers.

But now we've decided to go one step further.

This high quality **sub-contract** service will cover metrology, CMM measurement, quality inspection, and quality engineering.

Who's it For...?

Sub-Contract Quality Engineering & CMM Inspection Service

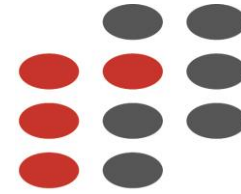

Our new CMM inspection and measurement service is for absolutely anyone who has a requirement for the service, whether it be new or existing customers.

So, regardless of where you've had your parts manufactured, we'll be happy to do the inspection for you and to give you some high quality, objective analysis.

We provide a cost-effective solution for manufacturers, engineers, product design agencies, OEMs, and Tier 1 suppliers, both in the UK and across Europe.

Benefits

Sub-Contract Quality Engineering & CMM Inspection Service

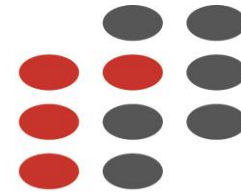

Dimensional inspection services are vitally important in ensuring that components meet their specifications. They help to ensure product quality and will identify any manufacturing issues related to performance, design, or appearance.

Our metrology and inspection services can potentially result in substantial long-term savings for customers, as well as ensuring that future production is not delayed.

These services range from one-off inspections to multi-batch inspections. We also offer highly competitive lead times as well as a collection and delivery service.

Key Service Elements

Below are just some of the key CMM inspection services which we will provide. This is by no means a comprehensive list, and we will happily try to accommodate any additional requirements which you may have.

CMM Measurement
and Support

In depth Reporting
(including FAIR,
ISIR & LAIR)

Surface-to-CAD
measurement

Statistical Process
Control (SPC)
Analysis

Gauge R&R

CMM Part
Inspection

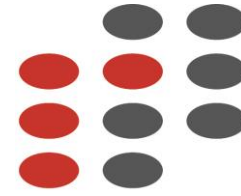

Capability Studies

Tool and Part
Certifications

Reverse Engineering
(using CMM)

What Else is on Offer?

Sub-Contract Quality Engineering & CMM Inspection Service

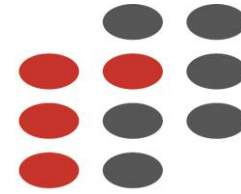

In addition to injection moulded parts, our work will also include CNC machined components, tooling, and castings.

We'll provide comprehensive reporting to supplement our investigations, and we'll also offer an advice and consultation service where our Quality Engineers will conduct a 1-hour online meeting with each customer to talk them through the findings of their report.

RP is externally audited each year to the approved ISO 9001 standard. All work is carried out in-house at our fully air-conditioned temperature-controlled quality engineering facility.

Want to Know More?

Sub-Contract Quality Engineering & CMM Inspection Service

Established in 2005, our award-winning company supports customers, both large and small, in the UK and overseas.

We're 'Without Limits,' which means we can handle any low-medium volume project no matter how complex it may be.

We're a single source solution for all your manufacturing needs. As well as Quality Engineering, we also specialise in toolmaking, injection moulding, CNC machining, and rapid prototyping.

If you'd like to know more about our new Sub-Contract CMM Measurement and Inspection Service, please contact us using the following contact data.....
